

SALUTE THE SUN

Sun is the name of the star.

Sun like many stars in the universe is nuclear.

Nuclear family sets the gold standard in humanity.

Soldiers salute the commander as she orders a nuclear attack!

The Sun is the supreme authority.

We salute him for the sunlight we need.

But we see plants and trees that do the same!

Then what do humans and this vegetation have in common?

Yes, all and one pays allegiance unto so.

Long live the Sun!

- Harshavardhan Vijay Moghe
